Thaw Htoo Zin

SOFTWARE DEVELOPER

I am a result-driven Software Developer specializing in architecting scalable digital ecosystems. Currently spearheading the development of the Digital Genius application, I focus on building robust full-stack solutions with a focus on efficiency and clean architecture. By balancing advanced AI-assisted coding workflows, I deliver high-performance web and mobile platforms.

EXPERIENCE

FULLSTACK LARAVEL DEVELOPER DIGITAL GENIOUS PLATFORM.

May 2025 – Present

- Designed and developed scalable Laravel REST APIs for mobile and web clients
- Implemented authentication, Ai payment verifications
- Integrated Firebase Notification system and Confirmation Email features
- Deployed applications on Linux VPS with Nginx & SSL
- Collaborated with mobile (Flutter) and frontend (React) layers

LARAVEL DEVELOPER ASOKABUDDHISTSTUDIES

2024

- Built backend systems for Course distribution and access control.
- Developed backend dashboard for content management & payment

PHP DEVELOPER / VOLUNTER

2024

- Managed a team working on the website with pure PHP
- Deployed the project into Linux AWS EC2 with nginx
